Computer Science Student
Sao Jose do Rio Preto, Sao Paulo, Brazil

## Summary

Allow me to introduce myself as a lover of the arts and knowledge.
I am passionate about books, chess, classic movies, classical
music, computers, poetry, philosophy and writing.
This combination of interests allows me to have a broad and critical view
of the world and the issues around me.

Regarding books, I am an unconditional fan of classic works, true crime,
physics, terror, fiction, existentialists, etc. In chess, on the other hand, I
see not only a game of strategy, but also an opportunity to challenge my
logic and reasoning. As for classic films, I admire the immortality of these
works, involving the image and soundtrack in a subtle and impactful way. A
good example of this are works such as: Taxi Driver (1976) and
Halloween (1978).

Classical music has a special place in my heart, as I have always been
moved by its complexity and symphonic beauty.
Finally, poetry, philosophy and writing, which inspire me to reflect on
existential questions and seek to understand the world and life in a deeper
way. I think writing is a good way to get to know yourself too.

I would like to highlight that these interests are not just hobbies for me, but
constant sources of learning and personal growth.
